PHARMACEUTICAL SEARCHES

There's a simple reason why TPR is recognized as the most capable pharmaceutical search firm in business today – our team knows your world. We've selected our people from among the best patent and non-patent literature search experts in the pharmaceutical industry. They intimately understand the unique challenges associated with finding and analyzing pharma information because they've experienced the process from the inside.

Whether for intellectual property protection covering worldwide patents on the one hand, or for R&D, clinical, regulatory, or competitor intelligence on the other, our distinct teams of searchers are true experts at finding information for each specific purpose.

Some types of pharmaceutical searches require a mastery of the complex indexing necessary for searching chemical structures, fragments, Markush representations and biosequences. Searchers also need the skills to effectively apply keyword and classification searching to diverse concepts ranging from drug delivery methods, formulations, consumer healthcare and even product packaging.

With a pharmaceutical search team uniquely qualified to understand the purpose of each search – and fully equipped with any necessary companion knowledge, such as patent law and FDA or other regulatory requirements – the end result is an expertly conducted search, intelligently analyzed, that provides easily assimilated information for your end user.

For internal or external IP counsel or other business executives, we ensure that our search and analysis services meet the pharmaceutical industry's own best practice standards for patent and non-patent literature searching. Beyond database searches, TPR has the capability to search for full-text, non-patent literature internationally in native languages, providing the additional firepower needed to uncover elusive references for invalidity and other business-critical types of searches. And for projects that demand the deepest level of information discovery and research possible, including obscure or 'gray' literature, our Validity Ultimate™ solution is the answer.

Patent & Non-Patent Literature
North America • Europe • Asia

▶ The TPR Difference

It was true during our first search in 1995, and it's true today. We're here to make a real impact for our clients – one that empowers them to make smarter, more insightful business decisions.

To do that, we leverage the most experienced searchers, the deepest subject matter expertise, and the broadest knowledge of U.S. and international patent and non-patent literature resources.

Today – and thousands of successful search projects later – we're known for our worldwide reach and exceptional search capabilities. It's a direct result of our diversity and depth of service, combined with our passion to go that extra mile to find business critical information and prior art.
